# DO.GE

passion for the molds

In 1978, after acquiring extensive experience in several business concerns, including abroad, Mr. Giorgio Dorigo Viani decided to put his skills into practice and set up DO.GE s.n.c. Specialising in the construction of vulcanised rubber moulds. Today, with the help of his wife, his children and skilled co-workers with over 30 years' experience, he designs and produces moulds for vulcanised rubber, silicone, Viton and plastic parts in general.

DO.GE s.n.c. provides customers with all its expertise and technology, guaranteeing quality, technical support and speedy deliveries.

DO.GE s.n.c. aims to satisfy every customer requirement.

DO.GE s.n.c. works together with reliable and certified partners, guaranteeing quality and service.

The importance of having a reliable partner to count on is fundamental for the success of a company;

#### **PLANNING DESIGN:**

- Product planning design and industrialisation
- Plastic injection mould planning design
- Vulcanised rubber mould design

#### **CONSTRUCTION:**

- Traditional plastic mould construction
- Bi-material plastic mould construction
- Vulcanised rubber mould construction (EPDM, SILICONE, VITON, NBR, etc.)
- Rubber equipment construction
- Third party mechanical machining

#### **MOULDING:**

- All types of plastic
- Vulcanised rubber (EPDM, NBR, SBR, NATURAL, VITON, SILICONE)
- Food grade and non
- RUBBER-METAL overmoulding

#### **FLEET OF MACHINES:**

- 6 x CNC controls DIN from 400x600 to 2000x800
- 4 x controlled and traditional lathes ØMAX 700
- 2 x 140 Ton plastic presses
- 4 x vulcanised rubber presses MAX 500 Ton
- Radial lathe, grinding and miscellaneous accessories for mould assembly and maintenance
- 5 x CAD/CAM workstations
